1) The flue calculation values apply for countries that require flue calculation in accordance with the DIN 18160 and DIN EN 13384 standards. It is recommendable to contact chimney sweeper beforehand

## Take a notice of the countryspecific approvals in section 3

NOTES!
The flue heat category required by the fireplace is $T 400$.
The recommended minimum flue height is 5 m with $\varnothing 180 \mathrm{~mm}$. In countries where the flue calculation is required, should the calculation be done according to the instructions and regulations of the flue calculation.
A damper designed for adjusting the draft is always recommended for a flue connection or flue. In the picture you can see the Finnish version.
Country- and region-specific regulations must be adhered to when installing the fireplace
